## STEP 2

# Install it

This space didn't have it before. Timber panelling was cut to size and installed on the walls.

### STEP 3

# Stir it

Make sure you stir it really well. Use a stirring stick, scrape the bottom of the can. Keep mixing until there are no chunks on the bottom and it's all mixed in.

## STEP 4

# Cut in

Use a cutting in brush to get clean edges. Make sure you also paint between each panel.

You can use masking tape along your edges if you are not confident you will get clean lines with your brush.

## STEP 5

# Roll it

### THE EXCITING BIT!

Pour the Floor Paint into a rolling tray.  
Then use a roller to roll that beautiful new paint  
onto your wall and watch the transformation.
